RISK AND REWARD PROFILE

Risk Disclaimer

The shaded area in the table above shows the Fund's ranking based on the synthetic risk and reward indicator (SRRI). The SRRI suggests the relationship between risk and potential returns when investing in the Fund.

There is no assurance that the Fund will meet its investment objective and you may lose money. The Fund's performance will be affected by market movements, but the Fund may lose money in a rising market. The Fund is neither capital guaranteed nor protected.

Please note that category 1 does not mean a risk-free investment. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund; the category might change in the future.

Why is the fund in the specific category?

The Fund has been classified as category 6 due to the nature of its investments, which include the risks listed below. This means that the purchase of units in the Fund is connected to medium risk of such fluctuations.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honor its commitments to the Fund, potentially creating a partial or total loss for the Fund.

Derivatives risk: A derivative may not perform as expected and may multiply the gains and losses made by the Fund.

Liquidity Risk: In difficult market conditions, the Fund may not be able to sell a security for full value or at all. This could affect performance and could cause the Fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of Fund operations or losses.

Market Risk: The value of investments and the income from them may go down as well as up and there is no assurance that the investment objective of the Fund will be achieved.

Credit Risk: Fund invests a portion of its assets in bonds. Their issuers may become insolvent, whereby the bonds lose their value entirely.

For more information about the risks of the Fund, please refer to the Risk Considerations section of the Prospectus and Supplement.
