**A USD Shares** ISIN: IE000U8IBWC7

The Company is managed by Waystone Management Company (IE) Limited

### Objectives and Investment Policy

#### Investment Objective

The investment objective of the Fund is to achieve long-term growth of capital through investments in equity securities of Emerging Market Companies.

#### Investment Policy

The Fund will be actively managed and will invest primarily in equity securities of Emerging Market Companies. These securities will consist of companies listed or traded on foreign stock exchanges or over the counter and in developed and Emerging Markets which have securities listed or traded on the Recognised Markets.

In managing the Fund's assets, the Investment Manager will follow a classic value strategy and conduct fundamental securities analysis. It will seek to identify companies from a universe generally consisting of Emerging Market Companies. It will construct a portfolio generally consisting of 30 to 60 companies that it believes are in the most undervalued portion of that universe.

Securities considered for investment will typically include companies undergoing temporary stress in the present business environment but where the Investment Manager judges there is a management plan or other mechanism by which earnings can be restored to the normal level.

Subject to the Central Bank Regulations, there is no limitation on the countries or geographic regions in which the Fund may invest, though the Fund will generally aim to invest at least 70% of its assets in Emerging Markets. It is anticipated that once the Fund is 90%

invested, the Fund generally will be invested in at least five different countries.

#### Risk Disclaimer

The Risk and Reward Indicator table demonstrates where the share class ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but also the greater risk of losing money. The ranking is based on historical data and it may change over time. It also may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the share class's ranking on the Risk and Reward Indicator.

#### Why is the fund in the specific category?

This share class is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

#### The indicator does not take into account the following risks of investing in this Fund:

**Currency Risk:** Investing in companies from across the globe can be rewarding and can spread risk to different markets. This does,

however, leave you open to the risk of currency rates and other factors reducing the value of your investment.

**Asymmetric information risk:** This Fund focuses its investments on stocks of companies that the Investment Manager believes are inexpensive relative to other stocks. These stocks are selected after careful disciplined review of publicly available information. There is a risk that important information is not disclosed, and that such information could have a negative impact on the value of the stock.

**Concentration risk:** This Fund holds a limited number of investments. If one of these investments falls in value it can have a greater impact on the Fund's value than if it held a larger number of investments.

**Emerging markets risk:** The Fund will invest in companies from parts of the world where the economies are still developing, known as emerging markets. Investments in emerging markets may involve greater risk due to general governmental and economic instabilities.

For more information in relation to the risk factors applicable to the Fund, please see the section entitled "Certain Risk Factors" in the Company's Prospectus and the section entitled "Risk Factors" in the supplement in respect of the Fund.
