Strategy

The information displayed above reflects the underlying holdings of the Fund. Investors will acquire shares in the Fund. The goal of the Pzena Global Value Fund is to achieve long term alpha generation. Pzena actively manages the Fund and to this end, Pzena employs a classic value investment philosophy, seeking to own good businesses at low prices. The investment team at Pzena focuses on companies that are underperforming their historically demonstrated earnings power. Intensive fundamental research is applied to these companies in an effort to determine whether the problems that caused the earnings shortfall are temporary or permanent. After the research process is complete and the company meets all the investment criteria, the Fund's portfolio managers may agree to add the name to the portfolio; their decision must be unanimous. Our sell discipline is guided by the same ranking system that informs stock purchases. We continuously monitor every position's valuation rank (based upon the company's current stock price relative to normalized earnings) within its investment universe. Generally we sell a stock once it reaches the midpoint of its investment universe; however, we may hold a security below this point in order to maintain a desired level of diversification.

Fund returns are benchmarked to the MSCI World Index (the "Index"). The benchmark is used for comparative purposes only. The MSCI World Index captures large and mid-cap representation across 23 Developed Markets countries. The index covers approximately 85% of the free float-adjusted market capitalization in each country. The Index cannot be invested in directly. The performance of the Index reflects the reinvestment of dividends net of withholding tax rates. The Fund's performance reflects the deduction of all Fund fees and expenses and reflects reinvested dividends (different share classes may vary). The Fund is significantly more concentrated in its holdings and has different sector and regional weights than the Index. Accordingly, the performance of the Fund will be different from, and at times more volatile, than that of the Index.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's, a division of S&P Global Inc. ("S&P").
