What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The Fund's objective is to provide returns linked to the performance of a portfolio (the "Reference Portfolio"). The Reference Portfolio aims to provide positive returns regardless of whether stock markets are falling or rising, by buying and selling mainly shares of large U.S. and non-US companies, including those in the technology industry and companies expected to grow quickly.

Investment policies The investment process involves buying undervalued and selling overvalued financial instrument.

The Reference Portfolio invests in publicly-traded shares, financial instruments with characteristics similar to shares, exchange-traded funds and foreign exchange contracts either directly or indirectly through financial contracts known as derivatives.

The Reference Portfolio may not always maintain a balance between financial instruments bought and sold, thus performance could reflect the performance of the market.

The Fund may invest in a wide range of instruments including shares, fixed income instruments (corporate and government bonds, which may be above or below investment grade) and investment funds (collectively, the "Funding Assets"). Thereafter, the Fund may enter into one or more derivative contracts with Morgan Stanley & Co. International plc (or an affiliate), as counterparty whereby the Fund will transfer the value of the Funding Assets to the counterparty in return for the performance of the Reference Portfolio.

The investment manager monitors the Fund daily and has discretion to change the asset allocation.

The Fund will hold an unleveraged exposure to the Reference Portfolio (i.e. the Fund will not expose more than 100% of its Net Asset Value to the Reference Portfolio), however, the Reference Portfolio itself will be leveraged. The Fund's gross exposure calculated taking into account the notional of all the derivative positions held within the Fund (including those within the Reference Portfolio) is generally expected to be between 300% to 500% of the Net Asset Value of the Fund.

Costs incurred in the use of derivatives may have a negative effect on the Fund's performance.

Benchmark The Fund is actively managed which means that the Investment Manager uses its expertise to pick investments to

achieve the objective of the Fund. As an actively managed fund, the MSCI World Index is used as a benchmark for risk management process purposes only; on any day the relative Value at Risk (VaR) of the Fund will not exceed 2 times the VaR of the benchmark index.

Redemption and Dealing Investors can buy and/or sell back their shares every Friday, if Friday is a public holiday in Ireland they can buy and/or sell back their shares the immediately preceding business day.

Distribution Policy Any income from the Fund will be re-invested and the Fund will not pay out any dividends.

Launch date The Fund launched on 14/09/2018. The share class launched on 14/12/2018.

Fund Currency The reference currency of the Sub-Fund is USD and the currency of the share class is GBP.

Conversion of units/shares The Fund offers other share classes for the categories of shareholders as defined in the Supplement. Shareholders may transfer shares of one sub-fund or class into shares of another sub-fund or class. For more information, see Transfer of Shares section of the Prospectus.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The manufacturer, Alkeon Capital Management, LLC, is not entitled to terminate the product unilaterally.

Practical information

Depository The fund depository is Northern Trust Fiduciary Services (Ireland) Limited.

Further information Further information regarding the ICAV and Fund will be provided in English including the Prospectus, Supplement and the latest annual and half-yearly reports. This information is available free of charge at <https://funds.waystone.com/public>. The Net Asset Values per Share Class are available from the Administrator.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://www.waystone.com/our-funds/waystone-management-company-ie-limited/>.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 25 December 2020 and 30 September 2022.

Moderate: this type of scenario occurred for an investment between 30 August 2014 and 30 August 2019.

Favourable: this type of scenario occurred for an investment between 26 February 2016 and 26 February 2021.

Recommended holding period		5 years	
Example Investment		10,000 GBP	
Scenarios		if you exit after 1 year	if you exit after 5 years (recommended holding period)

What happens if the Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 GBP per year is invested.

Example Investment 10,000 GBP	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	266 GBP	1,893 GBP
Annual cost impact*	2.7%	2.9%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.8% before costs and 5.9% after costs.
