Policy

This Policy focuses on ensuring sound and effective risk management through:

- A governance structure for setting goals and communicating these goals to employees;
 - Including both financial and non-financial goals in each employee’s performance and result assessments; and
 - Making fixed salaries the main remuneration component.
-

Remuneration Components

Remuneration of WAM employees comprises fixed remuneration and may include variable remuneration at the discretion of the firm:

- Fixed remuneration is the component of total remuneration specified in each employee's contract of employment and subsequent periodic salary reviews. The compensation package also comprises of certain fixed benefits, namely firm pension contributions, life and disability insurance, permanent health insurances and training and development benefits. Performance and appraisal reviews are undertaken twice per year and decisions on adjustment of the employee’s fixed salary, if any, are made on the basis of this continuing appraisal on a bi-annual basis.
- Variable remuneration – includes all discretionary elements of remuneration, which are proposed by the employee’s manager and reviewed and approved by the Managing Director. Bonuses are not guaranteed and are entirely at the discretion of the firm, taking into account the holistic employee performance assessment. WAM does not trade for its own account and does not take on credit risk in return for an expected reward. Therefore no variable remuneration will be attributable to the adoption of financial risk by any employee. Whilst the ability to pay discretionary remuneration is linked to the overall financial performance of the firm, each employee is assessed on their ability to perform their role and achieve a broad range of goals for growth and development on an annual basis.
