OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Sub-fund's investment objective is to target long-term capital growth.

Investment Policy

The Fund will invest its net assets in a portfolio of equity securities of companies domiciled in, or exercising the predominant part of their activity in the People's Republic of China ("PRC"). For purposes of the investment policies, the PRC excludes the Hong Kong and Macau Special Administrative Regions and Taiwan. Accordingly, the Fund will primarily invest in onshore Chinese public equity markets.

The Fund shall invest in China A-Shares using the "connect programs" of local stock exchanges in China, namely, the Shanghai-Hong Kong Stock Connect Program and the Shenzhen-Hong Kong Stock Connect Program, subject to any required approvals.

The Fund may invest in companies in any sector and of any market capitalization, but intends to invest primarily in mid- and large-capitalization companies that the Investment Manager believes are undervalued.

The Fund may also hold cash or cash equivalent instruments (which shall include, but shall not be limited to, short-term fixed income securities including Money Market Instruments and treasury bills). The Fund may from time to time hold up to 100% of its net assets in cash or cash equivalent instruments or Money Market Instruments.

The Fund may use foreign currency spot transactions for hedging against the Base Currency of the Fund.

The environmental and social characteristics promoted by the Fund, under Article 8 of the Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) are: (i) decarbonisation; (ii) the smart society; and (iii) transition to quality growth.

RISK AND REWARD PROFILE

Risk Disclaimer

The risk and reward indicator illustrates where the Sub-Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Sub-Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time.

Why is the fund in the specific category?

The Sub-fund has been placed in category 6, a high level of risk. Due to a lack of historical data for the Sub-fund this categorisation is

based partly on market indices' historical data which may not be a reliable indication of the future risk profile of the Sub-fund.

Are there any other particular Risks?

Operational Risk: The Sub-Fund may suffer loss due to human error or omission, process errors, system disruption or external events. Assets may be held by a correspondent.

Currency Risk: Changes in currency exchange rates could adversely impact investment gains or add to investment losses.

Emerging Market Risk: Emerging markets may face more political, economic or structural challenges than developed markets and shares may be less liquid, meaning that investments may not be sold quickly enough to prevent or minimize a loss; they may therefore involve a higher risk than investing in developed markets.

Risks of Investments in China A-Shares through Stock Connect Programs: The Sub-Fund may invest in China "A" shares via the Stock Connect Programs which may entail additional clearing and settlement, regulatory, operational and counterparty risks.

Further details on risk factors that apply to this Fund are set out in the Risk Factors section of the prospectus and the supplements.
